

Drive Automotive Productivity with Speech-Powered Operations

aiOla's patented speech technology integrates seamlessly into various workflows to enhance operational efficiency, improve safety, save time, and streamline operations. Teams across state lines and global borders can connect data, gain insights, and identify trends to expedite workflows and enable process optimization.

Our patented automatic speech recognition (ASR) and natural language understanding (NLU) technologies specifically address the automotive services industry's unique challenges, providing a tailored and comprehensive solution for automotive companies, repair shops, dealerships, and other automotive service providers.

Speak Productivity into Action

- Improve efficiency, productivity, safety, and operational excellence in an increasingly competitive market
- Complement human intelligence and enable your team to speak through inspections and checklists
- Understands 100+ languages and accents, as well as dialects, unique business jargon, and terminology
- Works seamlessly even with loud background noise in any acoustic environment
- Capture otherwise lost data, enable trend spotting, and receive analytics to derive valuable insights
- Integrates seamlessly with your existing technology stack, including any CRM or ERP system
- Little to no learning curve, making it simple for your team to use
- Maximize safety with verbal data implementation and hands-free operations

Sample Use Cases

Manufacturing

Implement speech-based solutions in production line checklists, quality inspections, SOPs, maintenance logs, pre-op, and in-process inspections to optimize production, increase safety of employees, and reduce error rates.

Automotive & Service Operations

Complete time-sensitive workflows and operations via speech, including: work orders, vehicle inspections, service recommendations, parts ordering, vehicle check-ins, parts procurement documentation and record-keeping, etc.

Distribution Centers

Optimize processes, such as receiving and unloading, sorting, order verification and documentation with speech-based solutions, while reducing the need for paper documentation.

aiOla's Impact:

Speak More, Do More

Reduce:

Vehicle check-in time, data entry time, diagnostic time, repair time, parts procurement, checklist and inspection processes

Optimize:

Customer satisfaction, on-site and manufacturing service center safety, manufacturing uptime, and overall operational efficiencies
